  - #16056: ✔ Allow resolving tax, orderUnit, billingUnit, prodFamily, and analyticalGroup by alternative fields when importing invoices for unreferenced products.

General

- Features:
  - #17622: 🔧 Update CSP to allow Pendo NPS guides to load from Google Cloud Storage.
  - #11579: 🔧 Snyk fix: Remove migrateConfig script.
  - #11579: 🔧 Snyk fix: Add HASH_PASSWORD_SECRET configuration key for passwords hashing.
  - #17548: ✔ Add operator switcher component. Only available for full Mapal OS login and with reference token client configuration.
  - #11579: 🔧 Snyk fix: Change variable name.
  - #17872: ✔ New currencies - MXN (Peso mexicano), GTQ (Quetzal guatemalteco), HNL (Lempira hondureño), USD (Dólar estadounidense),   NIO (Córdoba nicaragüense), CRC (Colón costarricense), PAB (Balboa panameño), CUP (Peso cubano), DOP (Peso dominicano),   HTG (Gourde haïtienne), COP (Peso colombiano), VES (Bolívar venezolano), USD (Dólar estadounidense), BOB (Boliviano),   PYG (Guaraní paraguayo), ARS (Peso argentino), UYU (Peso uruguayo), BRL (Real brasileiro).

Home

- Features:
  - #12910: ✔ Improved form and list UX (date rules, character limit, type icons and tooltips).
  - #17482: ✔ Added message delete confirm dialog, tooltips when a user doesn't have the right to do an action.
  - #17482: ✔ Added "re-highlight" action to move up a message in the display order.
  - #12909: ✔ Sort messages by descending re-highlight or creation date.
  - #17481: ✔ Added ability to pin an information message to the top of its category.
  - #17481: ✔ Changed "Inventory" module link to v2 inventories instead of v1 inventories.
- Bug fixes:
  - #17525: Fix edit information message modal after save.
  - #17842: The content of the home page now occupies the entire height of the screen without a double scroll bar.

Sites

Rights Management 🚫 *BETA screen, not available yet*

- Features:
  - #11617: 🚫 In the 'By profile' tab, new features have been added, accessible via the 'ellipsis' icon, allowing you to enable or disable all actions and pages.
  - #11614: 🚫 Display action icon before action name in Rights Management 'By right' tab.

Products

Price lists

- Bug fixes:
- #10996: Fix database error when two supplier products with the same chain have exactly the same updateDate

Suppliers

- Features:
  - #12887: ✔ The option 'Automatically validate receipt upon shipment' has been added to the internal supplier file (supplier-site). By enabling this option, the site no longer needs to validate receipts from this internal supplier; they are automatically validated as soon as the supplier-site validates the shipment of the order in "Site Supply". This option can be overridden by site.
- Bug fixes:
  - #17607: ✔ Supplier reactivation has been fixed.

Customers

Order cutoff schedules 🚫 *BETA screen, not available yet.*

- Features:
  - #17508: 🚫 Added the option to enable / disable the standard order cutoff schedule linked to the meal type.

Shipment

Site supply

- Bug fixes:
  - #11176: In the 'Delivered to site' filter, add the 'Load more' option to display the desired sites.

Tools

Imports / Exports

- Features:
  - #17361: ✔ Add `Trace of allergens` and `Product Category` fields to Industrial Product import.
  - #17563: ✔ Apply of fieldsNotToUpdate filters at the supplier import API endpoint in the case of inherited suppliers.
- Bug fixes:
  - #16889: (V0.745.1) Fixed invoice line association by reference. now the invoice lines supplier products are associated by reference correctly and they are shown in the same position (the forecasting and supplier invoices)
  - #11234: 🔧 Fixed "smart catalogue customer prices" import when there is no import file or empty data

Interfaces

- Bug fixes:
  - #17669: 🔧 Fix ma cantine interface login compatibility with new full MOS login.
