

Easyls 0.765.0

2026-04-28 11:30:34

The changes and bugs corrected in versions 0.760.1 and 0.760.2 are included in this version.

General

- Features:
 - #17872: Number separators are now displayed correctly for each currency.
 - #44190:  Upgrade kitten-mq to version 0.14.1 to have distributed traces for telemetry.
 - #11204:  Remove Carbone V1
- Bug fixes:
 - #44150: *(v0.760.1)* Revert kitten-mq version to 0.12.3 to fix a bug leading to crash the server at every message received.
 - #43112:  Fixed report download and opening new windows when Mapal login is active, the session cookie was no longer preserved in those flows.
 - #44172:  Fix stored cross-site scripting vulnerability in equipments.

Sites

Site settings

- Features:
 - #43648:  Correction to the (French) sentence "Les commandes livrées sur d'autres sites sont facturées par défaut à l'adresse de facturation renseignée *pour sur* chaque site livré "

Calendars

- Features:
 - #20814:  Migration to copy calendar data from a config into PeriodCalendar table (supplier bank holiday period type).

English, French and Spanish languages are now supported to create labels from user's default language in config.

- #39009:  User is now able to specify extld from "PeriodCalendar" database table in the 'Calendar sheet' modal window,
and extld from 'PeriodType' database table in the 'Period types' modal window.

Easyls Analytics

- Features:
 - #38797:  Following cases where user dashboard configurations were deleted unconsciously after selecting multiple dashboards, a warning popup was added so users are prompted before such changes take effect.

Rights Management BETA screen, not available yet

- Features:
 - #11615:  Added two filters in Rights Management: one to filter by enabled/disabled status, and another to filter by version range (from/to).

Products

Suppliers

- Bug fixes:
 - #43235: Now, payment methods appear in all languages.
 - #43336: Fixed loading of the list after saving changes on a supplier.

Customers

Customer contracts BETA screen, not available yet

- Features:
 - #11594:  Added the Customer contracts' offerings filter panel.
 - #11595:  Added search and filters for Customer contracts' offerings.
 - #10620:  Added the create and update apis of the customer contract offerings.

Order cutoff schedules

- Features:
 - #43182:  Add list API for custom order cutoff schedule

Sales

POS data

- Bug fixes:
 - #44408: Fixed the mapping dates when mapping the max period (from 2000-01-01 to 2099-12-31) resulting in a second empty mapping line being displayed in the mapping table.

Menus

Menus Predesign

- Bug fixes:
 - #21005 : The text search function in the Menu Design screen now scans all menu layouts on the site before applying the 50-item display limit; as a result, layouts beyond the first page are now visible during the search.

Supplier orders

Order preparation

- Bug fixes:
 - #11378: Fixed the supplier filter so that it also applies to products without recipes

Supplier orders

- Features:
 - #20815: ✓ Changed logic to make the system retrieve calendars associated with the period type "Supplier Bank Holiday – No Supplier Delivery».
- Bug fixes:
 - #39124: Now, unit in template showed correctly.

Receptions

- Features:
 - #16101: ✓ Modified POST /deliveries to add an optional substituteFor field on each product to identify the ordered product that was replaced by the delivered line.

Control on reception

- Features:
 - #20824: 🔧 Created job to process Good Receival Forms JOB_KAFKA_SENDING_GOODS_RECEIVAL to send to Compliance Kafka queues and the config variable JOB_KAFKA_SENDING_GOODS_RECEIVAL_MAX_RETRIES to allow max numbers of message send retries.

Shipment

Packaging and logistics

- Bug fixes:
 - #17552: (v0.760.2) Improved performance of packaging report APIs.
 - #44376: Fixed an issue where the packaging report generated a corrupted file or an error in some cases.

Stock

Stock removal

- Features:
 - #43746: ✓ When you select the 'by site orders' view, an option is now available in the filter panel to choose whether or not to display the output lines corresponding to orders already received by child sites.
- Bug fixes:
 - #43746: The site filter is now only shown for needs from menus.

Tools

Imports / Exports

- Features:
 - #43791: ✓ Improved menu-quantities import performance.
- Bug fixes:
 - #43324: Fixed the units' extId values in the supplier-product-v2 export.

Interfaces

- Bug fixes:
 - #44088: 🔧 Truncate the observation label on supplier invoice constatations sent to Orion to 50 characters and append "..." when shortened, to avoid Orion server errors when the value exceeds the maximum allowed length.
