

Easily 0.775.0

2026-05-26 11:38:07

The changes and bugs corrected in versions 0.770.1 are included in this version.

General

- Features:
 - #44283: ✓ Integrating AI Assistant
 - #43743: ✓ Added e-search-tree component (d-search-tree wrapper), added support for lazy loading and tree structuring in e-select-multiple.
- Bug fixes:
 - #45804: (v0.770.1) 🛠 Update ideos to 5.27.2 to fix a bug leading to block the SQL requests execution in slow queue.
 - #44528: 🛠 Technical, admin only, api endpoint added to disable delivery site address.
 - #46117: 🛠 Fxed the legacy product switcher display in V2 navigation by restoring its portal target.

Sites

Rights Management 🚫 BETA screen, not available yet

- Features:
 - #44263: ⚠ Enabled per-user configuration to control whether a screen is visible in the menu screen navigation bar, independently from profile settings.
- Bug fixes:
 - #46016: Fix empty labels on pages and actions when MULTILINGUAL_DATA_IS_ACTIVE is set to false or missing.
 - #46126: The empty profile labels in the comparator are now fixed.

Products

Products administration - V2

- Bug fixes:
 - #11433: The supplier filter now works correctly with all suppliers.
 - #44420: ✓ New columns added to the Pricelists analytics cube: supplier name, billing/order/storage unit labels, unit conversion ratios, product composition, storage type, allergen labels and trace allergen labels.

Menus

Menus

- Bug fixes:
 - #43429: Improved menu screen performance for sites with large recipe and category menu datasets.

Menu quantities v2

- Bug fixes:
 - #45329: Apply same schedule checks to planned menu-quantities as ordered menu-quantities

Supplier orders

Order preparation v2 🚫 BETA screen, not available yet

- Features:
 - #43743: 🚫 Added sites-search-tree component.

Dashboards

- Bug fixes:
 - #39856: 🛠 Fixed "Average order value by supplier": AVG on OrderSupplier_totalPriceSupplierProduct averaged line items instead of whole orders.

Shipment

Site supply

- Features:
 - #17626 : ✓ Now possible to select or create a batch for traceability
- Bug fixes:
 - #43736: Sort products in alphabetical order in the site supply screen.

Stock

Stock v2

- Features:
 - #17626 : ✓ Now its possible to select or create batch for traceability when adding or removing stock
- Bug fixes:
 - #45387: Added a dedicated right to allow creating stock outputs with origin "Loss or known shrinkage".
- Rights changes:
 - #45387: The right Create a stock output with the origin loss or known shrinkage has been added.

Inventories v2

- Bug fixes:

- #43615 : ✔ Fix inventory product price calculation when inventory is in progress. The price is now correctly calculated using the storage unit price instead of getting it from the billing unit of supplier product allowed flat.
- #17496: ✎ Fix the VAT rate field in the inventory (spreadsheet) report

Tools

Interfaces

- Features:
 - #44471: ✔ Optimarche interface now matches product origins by extId instead of label, making the integration resilient to label differences between Optimarche and Easyls.
- Bug fixes:
 - #44897: Orion interface was multiplying the invoice line amounts by the number of documents attached to the invoice.
